**Line Walk – Saving Costs for drawing parts**

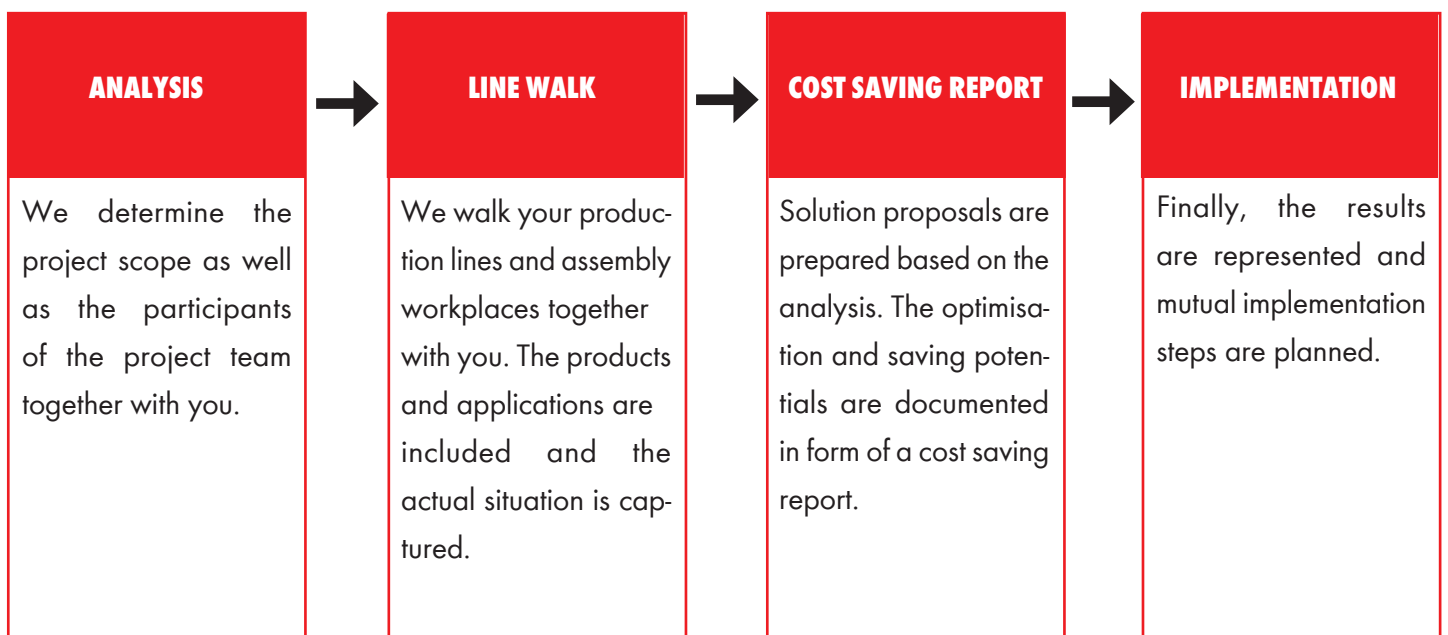

# SAVE COSTS **EASILY**

We identify optimisation potentials in drawing and special parts with you and support you actively in reducing the costs and increasing the productivity. Taking into account the direct and indirect manufacturing costs, we look for rationalisation potentials. In doing so, our focus is on product and evaluating it according to the aspects of process, quality and technology. Our experts and application consultants inspect the assembly of your series production systematically together with you and propose suggestions for cost optimisation.

## OUR LINE WALK IN DETAIL

## YOUR PRODUCT. OUR FOCUS. ONE SOLUTION!

We will inform you in detail about our modules and options on how you can save your manufacturing costs. Our experts are looking forward to assist you and work on exciting projects.
